

Welcome to RISKadvice.

We are a service company specialized in **Loss Assessment, Loss Adjusting, Engineering** and **Technical Consulting**.

We service insurers, insurance brokers, industrial concerns, public authorities and private clients. We work for our customers throughout the whole of Austria and countries around. Our team of experts has professional experience and is qualified in the fields of environmental engineering, agricultural sciences chemistry, hydrology and agrotechnology. We are a member of the *Austrian Federation of Independent Loss Adjusters – A.F.I.L.A.*

The focal points of consulting and planning in the business field **Environmental Technology** cover hydrogeological projects, environmental compatibility studies as well as a number of questions regarding current implications of contaminated sites, risk estimates and waste disposal management. Our experts cover a working spectrum of preliminary investigations right up to site studies, surveying, taking samples, analyses (in cooperation with partners), planning, securing evidence, project management, expert examinations, expert reports.

Our activities in the field of **Trade and Industry Consulting** cover environmental engineering, agrotechnic, waste management projects. Our activities and experience with environment technologies ensure competence in the compilation of reports, surveys and concepts. **RISKadvice** provides you with reports for official procedures and represents your interests at the authorities or other parties. The field of waste management and decrease of waste disposal costs is an important issue of our work. We help you to reach these targets with our experience in waste management. Among other things management systems are water permits are compiled.

With our **Loss Adjusting** and **Loss Management Service** we work throughout the whole of Austria. We cover the areas of environmental damage, investigations into technical losses, oil accidents, oil spills, agricultural claims, chemicals damage and subsequently product liability. With external partners we are able to cover all relevant areas of loss adjusting. Our professional experts compile risk analyse, claims management and have the expertise and technical background needed to handle claims and provide best client service.

RISKadvice experts are committed to delivering solutions for the optimum benefit of our clients. Technical and economic aspects, questions of liability and coverage as well as the protection of possible recovery interests are considered at the loss adjustment process.

Our company has a fast action task force to deal with severe damage to the environment.

In emergency cases we offer a 24 hour loss service. You can reach the loss adjuster on duty on our helpline **+ 43. 664 47 39 181**
